## Federal Signal SmartMsg Expands Your Communications Footprint

**The alerting and notification system that lets you connect with everyone. Any place. Any time. On any device.**

SmartMsg is an advanced suite of applications specifically developed to promote secure, reliable, cost-effective communication solutions for:

- Mass Alerting and Notification
- Interoperable Communications
- Incident Scenario Management, Multi-agency Coordination and Data Sharing

This open system, software-centric solution supports operational continuity through a user-friendly dashboard that integrates a full range of communication software tools. SmartMsg addresses virtually any critical communications requirement by taking advantage of an organization's existing communication devices and infrastructure, and strengthening and supplementing emergency systems already in place. The end result: a comprehensive communications solution for municipal public safety, enterprise and industrial applications that promises a return on investment that is clearly justifiable.

## Evans Dispatch III 24/7 Furniture

### The ultimate 24/7 sit-stand Dispatch Furniture Solution

The Dispatch III is the ultimate solution for all 24/7 command and control dispatch facilities. With years of industry experience involved in its creation, the Dispatch III exceeds all industry standards unlike any other product in the marketplace. Designed with a rugged steel and aluminum frame—the most structurally sound in the industry. The Dispatch III is durable and flexible. Providing the operator the ultimate convenience and comfort, with options that include Integrated Personal storage, Envirolinc and PowerLinc systems. The Dispatch III incorporates optional pop-up and slat wall power and data access including USB, DVI, Power, HDMI and Cat6 all prewired for easy connectivity.

**EVANS**  
CONSOLES

Incorporated Power and Data Receptacles provided in multiple locations

Integrated personal storage: Two large drawers allow for ample storage of personal items, ultimately decreasing work surface clutter

## BIRD TXXR RescueLine Signal Boosters

**RescueLine Signal Booster Series** - Complies with New International Fire Code and National Fire Protection Association (**IFC/NFPA**) Standards. The SBII and the SBIII Series have models that are part of the RescueLine product family.

 **613-8 Series, 700/800 MHz, Digital Signal Booster** operates in the 700/800 MHz range with 1-60 programmable digital filters for both uplink and downlink. Filter center frequency and characteristics are fully programmable to meet the demands of various systems and signals such as APCO 25 phase II. Filter bandwidth is programmable from 6.25 KHz to 15 MHz. All state-of-the-art product components are protected by a NEMA 4 style enclosure to meet the demands of the NFPA requirements. Intuitive web browser interface allows booster to be easily configured for changing RF environments.
