Pacific Northwest & Hawaii Edition

RF Technology Eclipse 2 Vehicle Repeater

Features

- Available in VHF, UHF, 700, and 800 MHz
- Power output up to 5 watts VHF, 3 watts UHF, 700, and 800MHz
- P25 Phase 1 Compliant
- AES / DES Encryption
- P25 or Analog
- PC programmable
- No in-band Tuning
- Create your own signal maps

The Eclipse 2 Vehicle Repeater is a full featured software defined (SDR) vehicle repeater Available in VHF, UHF, and 700/800 MHz, with transmit power levels of 5 watts in VHF and 3 watts in UHF, and 700/800

The Eclipse 2 VR is programable with the IP Commander software. This offers drag and drop editing, by clicking the apply button the features are enabled. Configurations can be saved to a file so that standard configurations can be easily programmed or sent to remote offices to ensure standardization.

Encryption keys for AES/DES can be loaded via the IP Commander software eliminating the need for a standalone key loader.

Introducing **Adaptable Connectivity**

Satellite Connectivity... Where you need it – when you need it

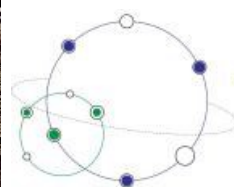

AdaptConn, Inc., a Satellite Communication Company, chose to focus its expertise on Emergency Communication Support for Government, Private Industry, and Families. Being a company located in Southern California we pay particular attention to Earthquakes and the resulting communication problems. Whether the disaster dictates supplying alternative communication systems when terrestrial based connectivity is compromised, or equipment and service for use at other remote or unscheduled locations, we can provide the solution.

Quote from Craig Fugate, Director of FEMA:

“When we talk about earthquakes in particular, because of all the types of disasters we face, they’re the ones that have the tendency to do the most damage to the infrastructure that creates the largest period of outages. The problem is compounded by damage to roads and bridges preventing quick deployment to infrastructure locations to affect repairs.”

Adaptable Connectivity

RAVEN's 911 Dispatch Everyone Can Afford!

At Raven Electronics, we work hard to offer some of the best dispatch software solutions. We are always pleased to add new features for our customers. Below are some of the most recent features currently added to HQi Dispatch. If you have already purchased Raven HQi Dispatch and you would like the most recent features.

HQi: 911 and Commercial Dispatch

HQi is a feature-rich, **911-capable**, dispatch solution and is a perfect compliment to our FlexGate Enterprise System. Adding HQi to FlexGate allows the user to have dynamic control and to **create patches** on the fly, **monitor traffic**, talk, listen and broadcast messages to any existing FlexGate resources, including SIP endpoints, Radios, RoIP/RTP sessions, FXO or FXS interfaces, as well as IP camera feeds.

[HQi Literature on the Raven Site](#)

New HQi Features

- **Separate Interface Tabs** -Organize different departmental functions.
- **Relay Module** -Activate or deactivate relays at the touch of a button, giving you features such as opening and closing doors.
- **Emergency Feature with Kenwood Radios** -When the emergency button is activated on the Kenwood radio, audio and visual alerts are sent to HQi, and will continually be sent until the operator attends to the emergency at hand.
